

Doris Rubio, PhD

Professor of Medicine, Biostatistics, Nursing, and Clinical & Translational Science at the University of Pittsburgh. She directs the Evaluation Core in the Clinical and Translational Science Institute (CTSI) and codirects the Research Education and Training Core. She is the past Director of the Design, Biostatistics, and Epidemiology Core for the CTSI. Additionally, she is the Co-Director of the Institute for Clinical Research Education, which provides training in clinical and translational research and offers multiple programs for career development. She is director of the Center for Research on Health Care Data Center, which provides data management and analysis services across the university. Nationally, Dr. Rubio serves multiple leadership roles. She is the Past President for the Association for Clinical Research Training and is past chair for the Evaluation Key Function Committee and past chair of the Common Metrics Workgroup for the Clinical and Translational Science Awards. She was recently awarded the Educator of the Year Award by the Association for Clinical and Translational Science. Her recent funding is focused on diversifying the workforce.
