

# Building Campus Ecosystems to Support Research Mentoring

Judith Stoddart, PhD  
Associate Provost

Senior Associate Dean, The Graduate School  
Michigan State University  
2020 CGS Summer Workshop

# Agenda

- The mentoring relationship: effectiveness and limitations of training
- Effects of COVID conditions on the mentoring relationship
- The mentoring ecosystem
- MSU: assessing and addressing the ecosystem
- Tools: research-based interventions, assessments, institutional alignment

# The mentoring relationship

Training in

- Effective communication
- Setting expectations
- Conflict resolution
- Culturally responsive mentoring

# The mentoring relationship

Good news: research shows this training works. Curricula such as *Entering Mentoring* and *Entering Research* can shift knowledge, skills and practices of mentors and mentees.

## **Focusing on mentor/mentee training as a mechanism for building institutional capacity in inclusive excellence in mentoring can:**

- Give individuals tools to improve their skillsets
- Help mentors and mentees recognize how identities influence professional and personal development
- Encourage mentoring that is adapted to career goals
- Strengthen mentoring relationships
- Improve career outcomes and satisfaction

## Window of “Negotiable” Expectations

*From Setting Expectations and Resolving Conflicts in Graduate Education*

# Window of “Negotiable” Expectations

*From Setting Expectations and Resolving Conflicts in Graduate Education*

# Explicit Expectations

are set by jointly examining future goals and decision points

and then checking for mutual understanding

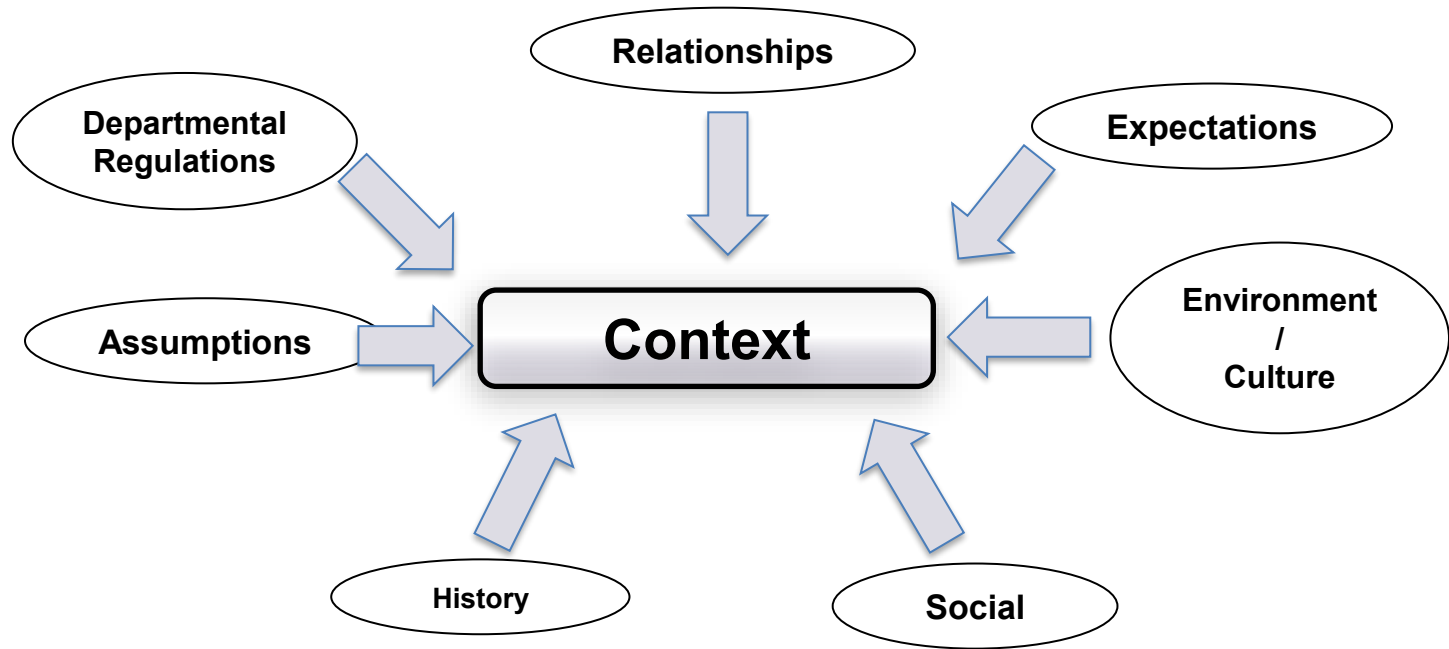

# Explicit Expectations

are set by jointly examining future goals and decision points  
in this order:

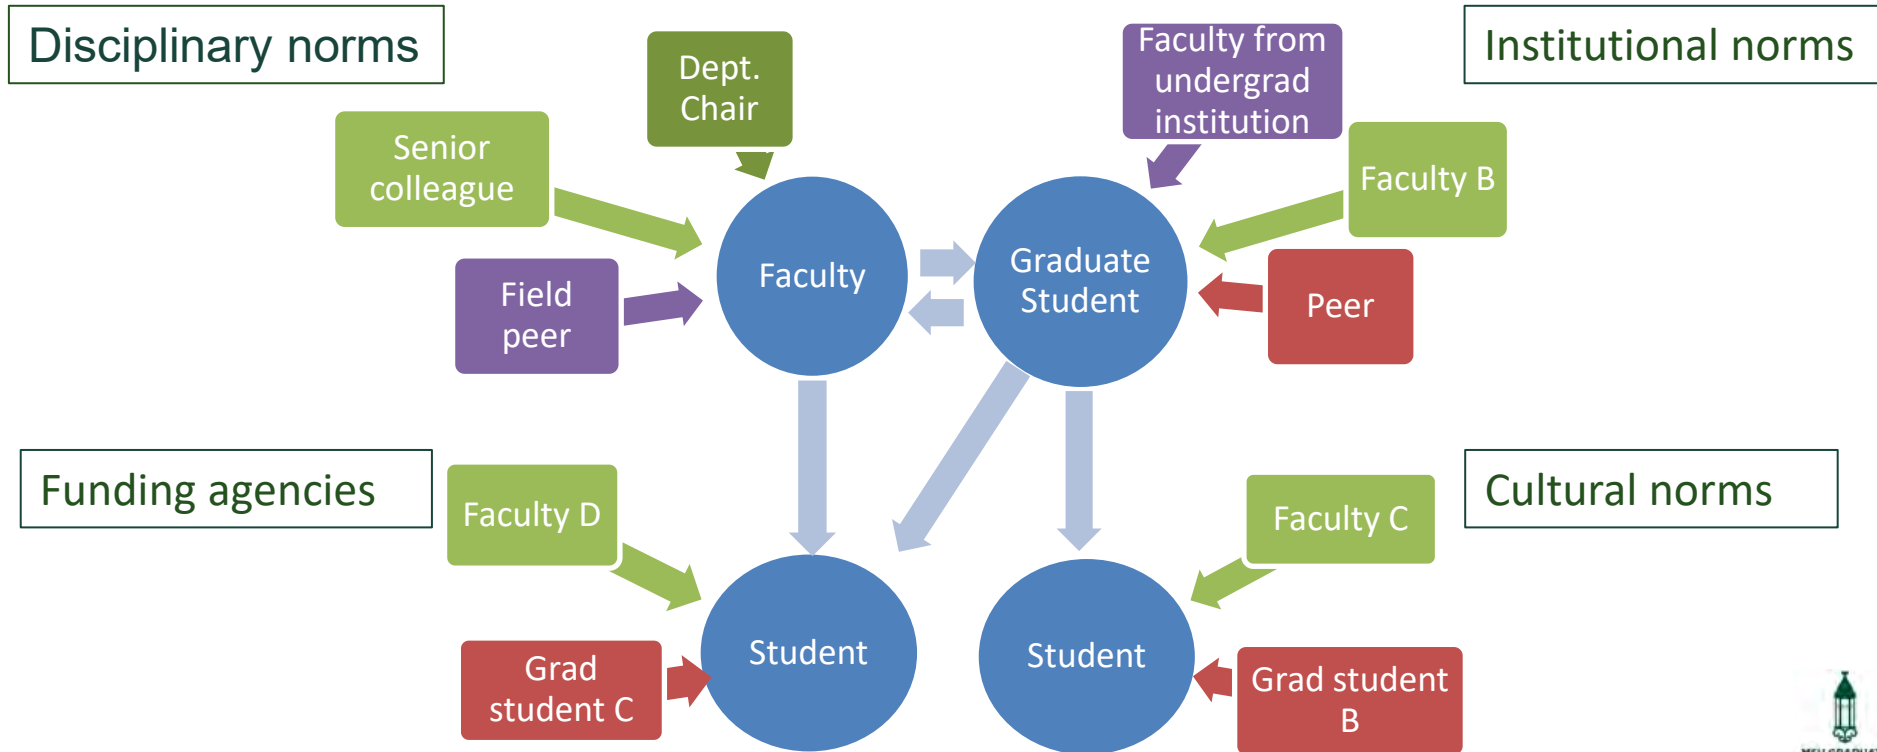

and then checking for mutual understanding

# The importance of context

*From Setting Expectations and Resolving Conflicts in Graduate Education*

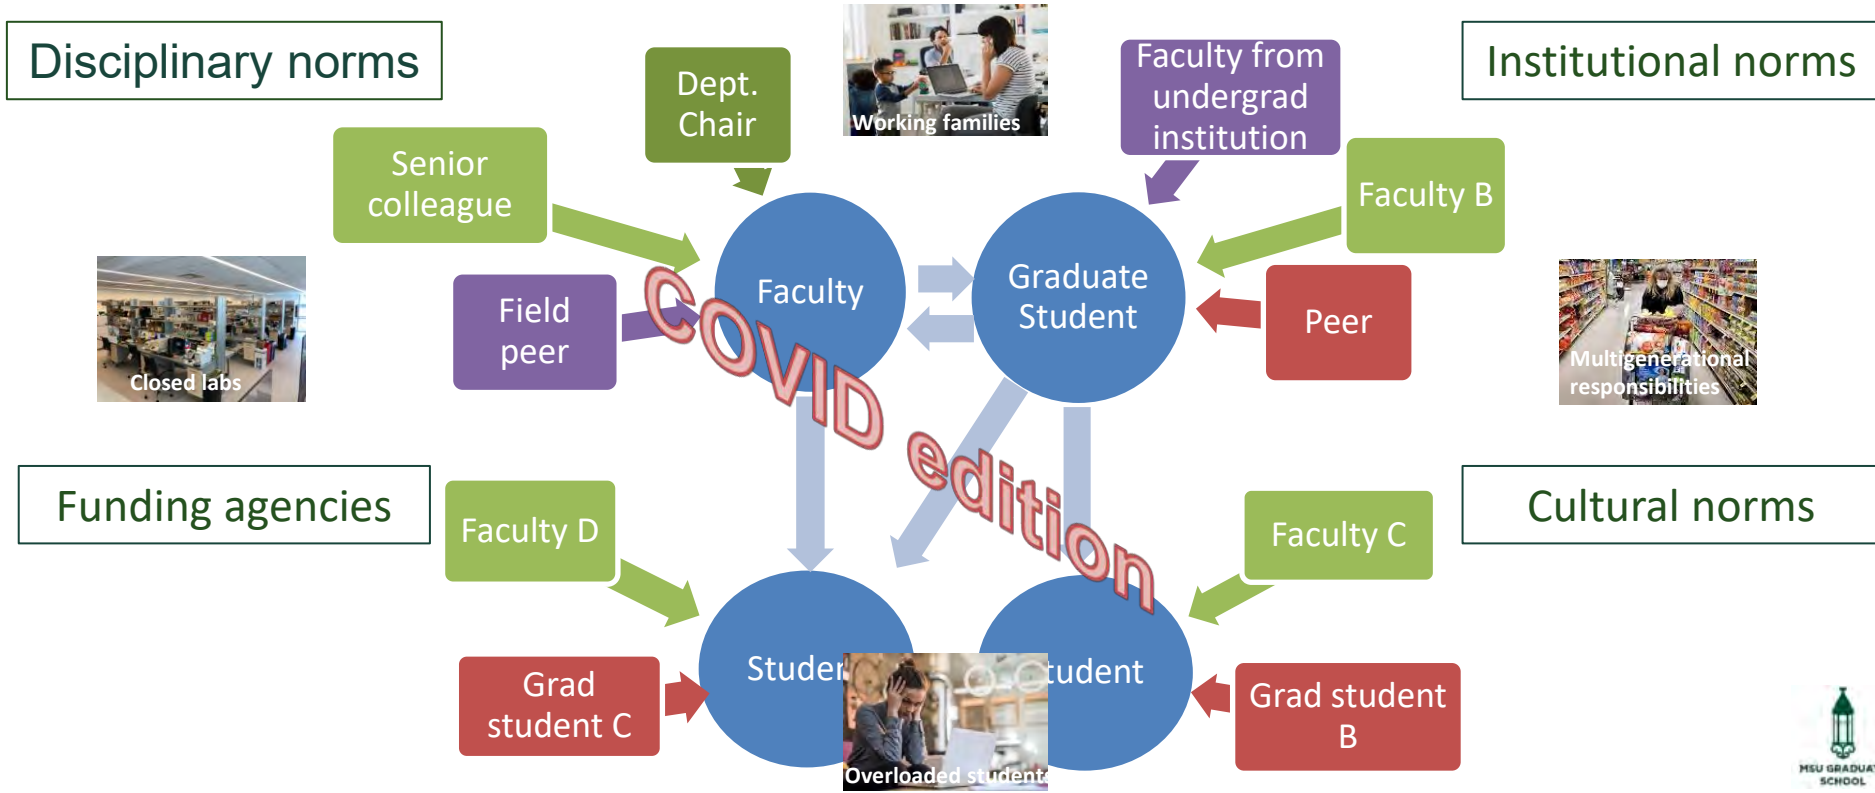

# The mentoring relationship

**Focusing on mentor/mentee training as the primary mechanism for building institutional capacity in inclusive excellence in mentoring can:**

- Simplify the roles of mentor/mentee
- Send the message that effective mentoring is an individual responsibility (and an individual failing when it goes wrong)
- Reinforce institutional homeostasis
- Leave systemic issues intact, many of which cannot be overcome by effective mentoring

# The mentoring relationship

## **The stress on individuals during the pandemic has revealed some of the underlying weak points in our campus ecosystems:**

- Individual skillsets are not always a match to circumstances
- Context matters, and how we define context matters
- Systemic inequalities have been magnified
- Mentoring responsibilities are distributed differentially across individuals, especially those from historically minoritized groups
- Individuals strain to compensate for an ecosystem that does not sustain mentoring

**What are the resources and strategies for creating a healthier ecosystem?**

## Mentorship ecosystem

“A set of interconnected participants including university leadership (e.g., presidents, provosts, deans), department chairs, program leaders (e.g., research, training, and graduate program directors), mentors (faculty members, staff, and others who have extensive contact with graduate and undergraduate students), and mentees (undergraduate and graduate students participating in mentoring programs and other mentoring relationships), and agencies that fund mentorship programs.”

## Where our own campus was pre-pandemic

- Diagnosing issues
- Shifting to a different approach to the ecosystem
- Thinking structurally—changing the metaphor
- Working on embedding, scaffolding and alignment
- Creating communities of practice and transformation

# Diagnosing issues

## 2018 Graduate School Strategic Plan

Objective 1.1 Mentoring: We will increase MSU's capacity for inclusive excellence in mentoring for and by students.

- Work with academic units to develop a template for evaluating mentorship activities for use as part of faculty development programs, annual review, and RPT.
- In collaboration with our campus partners, establish a broad-based professional development program for faculty and academic staff focused on mentorship of graduate students.
- Facilitate further integration of annual RCR training within disciplinary contexts.
- Develop a tiered professional development program for graduate students aimed at developing their skills and abilities as mentors and mentees.

## Externally validated assessments

## Dean's Task Force on Graduate Student Mentoring 2018-19

- Revisit *MSU Guidelines on Advising Relationships and Guidelines for Integrity in Research and Creative Activities* (2004)
- Review:
  - ✓ National reports on mentoring and professional community
  - ✓ Recommendations and statements by federal agencies and disciplinary societies
  - ✓ Guidelines at other universities
  - ✓ Research on effective mentoring
  - ✓ MSU data on mentoring
- Recommend other measures that would support the Graduate School strategic priority on expanding inclusive, high-quality mentoring practices on campus

# Revised guidelines

Institutional alignment

- shared values
- shared rights
- shared responsibilities

Distributed responsibilities

Process for revision and assessment

# Statement on values

## Foundational Values

### for Graduate Student and Faculty Mentoring Relationships at Michigan State University

Effective mentoring relationships are formed and sustained through principles of reciprocity and mutual responsibility. Mentors and mentees should respect one another both as researchers/scholars/creative practitioners and as individuals. That respect is formed through a shared commitment to scientific, creative and professional excellence, and a recognition of these common values:

- **Commitment to respect and care**
  - Establishing a relationship based on trust and open communication
  - Engaging in ways that are respectful and culturally responsive
  - Actively promoting an environment of civility
  - Using inclusive and non-discriminatory language
- **Commitment to professionalism, ethics, and integrity**
  - Communicating regularly about expectations in the graduate degree program in the disciplinary field
  - Promoting the highest standards of integrity in research, scholarship, and creative activities
  - Engaging in continuing professional development in mentoring skills
- **Commitment to the professional and personal growth and independence of the student**
  - Talking with students about their interests in a range of career paths
  - Encouraging and supporting career exploration and professional development
  - Supporting mental and physical health

Operating with a shared and acknowledged set of values will help the campus sustain a climate that supports strong mentoring relationships.

# Distributed responsibilities

Effective advising and mentoring of graduate students is the joint responsibility of the University, the Graduate School, graduate degree-granting and program units (hereafter referred to as academic units), the faculty advisors, and the students.

## **Responsibilities of MSU include:**

- Creating a climate of mutual accountability
- Communicating the value of graduate education to MSU's mission
- Setting expectations that graduate student mentoring is an important faculty and unit responsibility
- Supporting MSU's offices that contribute to graduate student education and well-being

## **Responsibilities of the Graduate School include:**

- Providing resources and training to help faculty and graduate students continuously improve their mentoring skills and abilities
- Providing information to units to help them fulfil their mentoring responsibilities
- Advocating for excellence in mentoring including inclusive mentoring practices
- Regularly assessing various aspects of mentoring on campus (e.g., through surveys, focus groups, or other applicable means).
- Partnering with other units to provide additional mentoring and professional development opportunities
- Recognizing and rewarding faculty and students who exemplify excellence in mentoring (e.g., through annual mentoring awards)
- Serving as a contact point for faculty and students who experience difficulties in mentoring relationships

“Effective advising and mentoring of graduate students is the joint responsibility of the University, the Graduate School, graduate degree-granting and program units (hereafter referred to as academic units), the faculty advisors, and the students”

# Communities of transformation

## CoTs at MSU

- College Graduate Student Mentoring Advocates
- Faculty and staff learning community on mentoring
- Trained community of NRMN certified facilitators across disciplines and faculty levels
- AGEP peer communities

“communities that create and foster innovative spaces that envision and embody a new paradigm of practice....CoTs are aimed at embedding innovative/transformational practices within departments and institutions.”\*

Kezar, Gehrke, Bernstein-Sierra (2018) “Communities of Transformation: Creating Changes to Deeply Entrenched Issues,” *The Journal of Higher Education*, 89:6, 833.

MSU Guidelines for Graduate Student Mentoring & Advising

Implementation Toolkit

Workshops & Mentorship Training

Mentoring Awards

HOME > MENTORING

As per the Guidelines for Graduate Student Mentoring Advising, we are providing a set of resources for support units, faculty and graduate students as they implement best practices to optimize mentoring relationships at MSU. This toolkit incorporates materials that will be relevant for a wide variety of disciplines.

There are five types of resources in this toolkit: (1) Student-Advisor Expectations Scales; (2) Written Mentor-Mentee Agreements; (3) Doctoral Student Progress Towards Degree Worksheets; (4) Mentor Evaluation Resources, and (5) general resources on diversity & inclusion in graduate education.

In each section, there are worksheets, models (from others), and scholarly articles for your use.

STUDENT-ADVISOR EXPECTATION SCALES

One of the most important things mentors and proteges can do at the beginning and throughout the relationship is to continually align expectations. Faculty and students may have a difficult time having a frank discussion with one another about their relationship. Student-advisor expectations scales like the one below contain useful prompts for these conversations.

RESOURCE:

- Worksheet: Student-Advisor Expectation Scales (PDF)

Original from Ingrid Hesse: 1993, Higher Education Research and Development Society of Australia. Adapted by Margaret Wiley and Kate Coleman, 1997, Centre for Learning & Teaching, Univ. of Technology, Sydney. Further adapted by Chris M. Goss, 2010, Michigan University.

WRITTEN MENTOR-MENTEE AGREEMENTS

Written Mentor-Mentee Agreements serve to codify expectations once they have been discussed. The types of expectations that can be addressed in mentor-mentee written agreements are unlimited.

RESOURCES:

# The Science of Effective Mentorship in STEMM Online Guide

THE SCIENCE OF  
EFFECTIVE MENTORSHIP IN STEMM  
ONLINE GUIDE V3.0

Overview • Mentoring Defined • Program Development and Management • Actions and Imps •

Mentorship is essential in developing science, technology, engineering, mathematics, and medicine (STEMM) professionals. It is a set of skills that can and should be learned, practiced, and improved upon with self-reflection and feedback. If you are a mentor or mentee yourself, or if you are a leader in your organization responsible for ensuring that your faculty and their mentees have the skills to engage in the most effective mentoring relationships, this website is for you.

Throughout this website, you can find:

- RESOURCES**  
Help develop and maintain strong and effective mentorship education initiatives in STEMM
- MENTORING TOOLS**  
Successful mentorship programs and tools for establishing strong mentoring relationships, particularly between faculty and students who have been traditionally underrepresented in STEMM fields
- INFORMATION**  
Convince STEMM faculty and institutional leadership of the value of effective mentorship and the harms that can result from negative mentoring experiences.

**RATIONALE**

Mentoring has an important role in the science, technology, engineering, mathematics, and medicine (STEMM) fields. Mentoring experiences can be transformative for both mentors and mentees. Despite its essential place in the academic STEMM culture, mentorship rarely receives the focused attention, evaluation, and recognition of other aspects of the professional development process such as teaching and research.

**Undergraduate faculty**

My institution takes mentoring into consideration during performance reviews

Recommendations

# Assessments

- National Research Mentoring Network (NRMN)
- Center for the Improvement of Mentored Experiences in Research (CIMER)
- University of Wisconsin Institute for Clinical and Translational Research Mentoring Competency Assessments
- SOURCE
- gradSERU

# Institutional Alignment

- Who is in your institutional mentoring ecosystem?
- How would you map their relationships?
- Are the values embedded in each area? (assess)
- How are they communicated institutionally and individually? (assess)
- Do the incentives match the values?

# Institutional Alignment
